Senior Data Analyst with five years of experience building reliable reporting, data models, and analytical workflows for sales and operations teams. Specializes in CRM data quality, PostgreSQL, Python, Power BI, and business-process improvement to turn complex data into practical decisions.

TECHNICAL SKILLS

Analytics & BI: Power BI, DAX, KPI Design, Dashboard Development, Customer Retention Analysis, Data Storytelling

Data & Engineering: SQL, PostgreSQL, Python, Pandas, dbt, Docker, ETL/ELT, Dimensional Modeling, Data Quality

Business Systems & Tools: HubSpot, Oracle NetSuite, AWS, Excel, Google Sheets, Git/GitHub

AI Tools & Workflows: GitHub Copilot, ChatGPT, Claude, AI-assisted development, code validation

PROFESSIONAL EXPERIENCE

Senior Data Analyst | PropLogix | Sarasota, FL | Nov 2022 - Present

- Design and develop user-friendly applications with AI-assisted coding to streamline recurring tasks, save time, and improve consistency in personal workflows.
- Develop bulk data-cleaning workflows with AI support, validating the code and its output to improve business data record accuracy.
- Lead data governance initiatives that improve data integrity and reliability by 35%, strengthening executive reporting and decision-making.
- Design scalable CRM and operational data models that connect business entities, standardize reporting logic, and increase analytics adoption by 50%.
- Improve ETL processes and data-loading workflows by 20%, supporting more timely reporting and analysis across sales and operations.
- Develop Power BI dashboards and SQL-based reporting that track KPIs, customer activity, sales performance, and operational trends.
- Partner with executives and cross-functional teams to translate business questions into documented data requirements, metrics, and actionable recommendations.

Senior Process Improvement Specialist | PropLogix | Sarasota, FL | Jan 2022 - Nov 2022

- Led the migration and consolidation of customer-support platforms, bringing multiple customer-facing teams onto a unified operating model.
- Selected and implemented a performance-management platform that replaced a manual process, improving workflow efficiency and employee engagement.
